Economic report and outlook

According to Kenya National Bureau of Statistics (KNBS) Quarterly Gross Domestic Product Report, the Kenyan economy recorded a 5.2% growth in Q2'2022, lower than the 11.0% growth recorded in Q2'2021, pointing towards slower economic growth. The biggest gainer in terms of sectoral contribution to GDP was the Financial services and Insurance sector, increasing by 0.5% points to 8.8% from 8.3% in Q2'2021, while Agriculture and Forestry was the biggest loser, declining by 1.5% points to 19.4% in Q2'2022, from 20.9% in Q2'2021. Mining and Quarrying sector recorded the highest growth rate in Q2'2022 growing by 22.6% compared to the 10.9% growth recorded in Q2'2021. The Real Estate sector recorded a growth of 5.5% in Q2'2022, 1.9% points lower than the 7.4% growth recorded in Q2'2021. The decline in performance was mainly attributed to increased cost of construction materials hindering optimum investments, coupled with the looming pre-election uncertainties.

During the month, yields on the shorter dated Government papers recorded mixed performance, with the average yields on the 91-day and 364-day papers increasing by 0.1% points and 0.3% points to 9.2% and 10.2% respectively, while yields on the 182-day paper remained relatively unchanged at 9.7%. Additionally, the Kenyan Shilling depreciated by 0.9% against the US Dollar to close the month at Kshs 122.4, from Kshs 121.3 recorded at the end of October 2022, mostly attributable to increased dollar demand from energy and merchandise importers.

November 2022 inflation rate came in at 9.5%, down from 9.6% in October 2022. The inflation rate remains worryingly above the government target range of 2.5%-7.5%, mainly attributable to elevated food and fuel prices.

As of 28th October 2022, Cash, bank deposits and government securities constituted 56.7% of the portfolio.
