2. FUND MANAGER'S REPORT AND OUTLOOK
Fund Objective

The Cytonn Money Market Fund is a low-risk fund that seeks to obtain a high level of current income while protecting investor's capital and liquidity.

Portfolio Strategy

The portfolio objective will be to outperform the income yield available on money market call accounts and fixed deposit accounts by investing in interest-bearing securities and other short-term money market instruments. These securities are usually available to the wholesale or institutional clients. The Fund will also be managed conservatively with active management of duration, credit and liquidity risks.

Economic report and outlook

According to Kenya National Bureau of Statistics (KNBS), the economy recorded subdued growth of 4.9% in Q1'2020, lower than 5.5% in Q1'2019 a 2-year low, mainly supported by the Agricultural sector which recorded a slightly faster growth of 4.9%, compared to 4.7% seen in Q1'2019, coupled with slower growth in other sectors attributable to effects emanating from the COVID-19 pandemic. During the month, there was a marginal downward readjustment on the yield curve, which saw the FTSE NSE Kenya Government Bond Index gain by 0.1%, taking the YTD performance to a 1.2% gain. The downward readjustment is mainly attributable to increased demand, due to the bias by banks towards government securities as opposed to lending due to increased credit risk. Inflation has remained within the Central Bank's target of between 2.5% and 7.5%, with the September y/y inflation coming in at 4.2%, a decline from 4.4% in August, driven by a 0.1% decline in the Housing Water, Electricity, Gas and other fuels' index coupled with a 0.01% decline in the Transport index. During the month, the Kenyan shilling remained under pressure against the US dollar, losing by 0.3%, to close the month at Kshs 108.5 from Kshs 108.2 in August, mainly attributable to increased end-month importer dollar demand amidst lackluster dollar inflows.
