

We Choose Safe

- ⊕ In compliance with the mitigation measures on COVID-19 pandemic in the Country, Cytonn Investments has put the following strategies to balance the safety and health of our stakeholders while ensuring business continuity.

1. Operations of Cytonn:

- ⊕ Our offices shall remain open, having put in place recommended precautions. For investment instructions, we encourage you to send an email to operations@cytonn.com and we shall respond within 24hrs or call **0709 101 200**.
- ⊕ You can use the web application on clients.cytonn.com or the mobile application to interact with any of our products. For our Cytonn Money Market Fund clients, you can access our services through USSD by simply dialling ***809#**.

2. Investment Performance:

- ⊕ Our fixed income assets returns remain attractive, and we are confident of maintaining attractive returns to our investors, given that the investments we undertake are long-term in nature therefore allowing the portfolios to withstand the current volatility.
- ⊕ In light of the perceived views on the performance of the real estate sector, the decision to pursue the phasing strategy for our developments - which entailed reducing the number of ongoing developments and pursuing demand driven construction – places the firm in a stronger position.

3. Wealth Management Training:

- ⊕ Given that it is not advisable to continue holding our weekly trainings due to social distancing, we shall be doing webinars moving forward.
