## 2. FUND MANAGER'S REPORT AND OUTLOOK

### Fund Objective

The Cytonn Equity Fund is a moderate to high-risk fund that seeks to generate long-term capital growth and endeavors to maximize the total return to investors over the long term by investing in both listed and unlisted equity securities.

### Portfolio Strategy

The Fund seeks to invest in companies with low valuation and growth potential while providing sufficient stability by investing in relatively mature companies. The key is to deliver a high total return from both capital appreciation and attractive dividend yields. The Fund seeks to outperform the benchmark, NSE 20, by maintaining a carefully selected and diversified portfolio.

### Portfolio Performance

Cytonn Equity Fund declined by 4.5% in the month of October 2023. The performance of the fund was driven by losses recorded by portfolio stocks such as KCB, Safaricom and DTB-K of 16.1%, 14.7% and 6.0% respectively. The losses were however mitigated by gains in the fixed income docket.

### Economic report and outlook

According to Kenya National Bureau of Statistics (KNBS) Quarterly Gross Domestic Product Report Q2'2023, the Kenyan economy recorded a 5.4% expansion in Q2'2023, faster than the 5.2% growth recorded in Q2'2022. The growth was mainly supported by a rebound in agriculture, fishing and forestry sector, which grew by 7.7% in Q2'2023 compared to a contraction of 2.4% in Q2'2022. The biggest gainer in terms of sectoral contribution to GDP was the financial and Insurance sector, increasing by 0.7% points to 9.6% in Q2'2023 from 8.9% in Q2'2022, while Manufacturing sector was the biggest loser, declining by 0.3% points to 8.0% in Q2'2023, from 8.3% in Q2'2022. The Financial and Insurance sector recorded the highest growth rate in Q2'2023 growing by 13.5%, albeit slower than the 16.1% growth recorded in Q2'2022. Real Estate was the second largest contributor to GDP at 10.0% in Q2'2023, remaining relatively unchanged from Q2'2022, indicating sustained growth. Notably, the Real Estate sector grew by 5.8% in Q2'2023, 0.8% points higher than the 5.0% recorded in Q2'2022. We expect the economy to grow at slower pace on the back of elevated inflationary pressures as well as the sustained depreciation of the Kenyan Shilling against the dollar which has resulted to a reduced consumer purchasing power.

During the month, yields on the shorter-dated Government papers were on an upward trajectory, with the average yields on the 364-day, 182-day and 91-day papers increasing by 0.6% points, 0.5% points, and 0.5% points to 15.3%, 15.1%, and 15.0%, respectively. Additionally, the Kenyan Shilling depreciated by 1.7% against the US Dollar to close the month at Kshs 150.6, from Kshs 148.1 recorded at the end of September 2023, largely attributable to increased dollar demand from energy and merchandise importers. The October 2023 inflation rate increased marginally to 6.9% from the 6.8% recorded in the month of September 2023, marking the fourth consecutive month that the inflation has remained within the CBK target range of 2.5%-7.5%.

During the month of October 2023, the equities market was on a downward trajectory, with NASI declining the most by 7.0% while NSE 20, NSE 25 and NSE 10 declined by 3.2%, 4.2% and 4.3% respectively. The equities market performance was driven by losses recorded by large-cap stocks such as KCB, Safaricom, Stanbic Bank and Diamond Trust Bank-Kenya of 16.1%, 14.7%, 6.1% and 6.0% respectively. The losses were, however, mitigated by gains recorded by large cap stocks such as Equity Group and NCBA of 5.6% and 1.8% respectively. The market closed the month trading at a price to earnings ratio (P/E) of 4.7x, 61.8% below the historical average of 12.3x, and a dividend yield of 10.1%, 5.8% points above the historical average of 4.3%.
